📇 Profile

- I'm a **Python Backend Developer** who enjoys turning ideas into working digital systems. My focus is on creating **scalable APIs** and **reliable backend services** that solve real problems.

- 💼 I have worked on projects such as an **E-commerce platform** and an **AI-powered Telegram bot**, applying technologies like **Django, FastAPI, PostgreSQL, Celery, Redis, Docker, and NGINX**. These projects helped me gain strong experience in backend architecture and performance optimization.

- 🌱 At the same time, I am actively expanding my skills beyond backend. I'm learning **Next.js** and **React**, exploring best practices and patterns to build **flexible and user-friendly web applications**.

- 🎯 My long-term goal is to grow into a **Senior Developer**, contributing to **ambitious, large-scale projects** that push technology forward and create real impact.
